Management Community

2019 MEDIA PACK

By Energy Users for Energy Users

The official Show Guide for

Published 6 times a year, THE EMA MAGAZINE covers news and features related to energy management, sustainability and environment. It is aimed at anyone with Energy Management responsibilities, who needs to stay informed about the latest news, legislation and best practice in the field of energy management.

Distributed to more than 5,000 national members, who in turn are responsible for over 54% of spend in the Energy Sector which equates to an annual market expenditure of over £12bn per year. Research conducted by the publishing industry shows that more than 70% of recipients share a professional magazine with at least four peers or colleagues, reaching 25,000 people in the industry every month.

Legacy and future:

For over 6 years, The Energy Managers Association (EMA) has kept its members abreast of bringing energy management to the heart of British business: accurate information, expert comment, case studies, events, training, courses, in-depth articles, buyers guides and legislation services updates. Every month the EMA holds working groups, members’ meetings, conferences and research with prominent experts discussing relevant topics and trends. The EMA presents itself as a knowledge base to government in issues around Energy Management. It is no secret that legislation cannot be changed overnight and the EMA works closely with BEIS, DEFRA and BIS so that future policy works for practitioners rather than just on paper.

Challenging: Core features and topical articles are researched and written by the EMA members and external authors. Our network of contributors include the top practitioners, researchers and thought-leaders of their fields.

The EMA Board’s vision is to put energy management at the heart of British Business and to establish best practice in the energy management industry.

The following pages give a more detailed breakdown of our audience. In 2019 we have strategies to deliver even more and if you have specific sectors within the audience that you wish to target, we are happy to explore those options for you.
