

EMA SPOTLIGHT 2023

Thursday 12 October | 14:30–17:00 | Zoom

AGENDA

14:25 THE ZOOM WAITING ROOM OPENS

14:30 - 14:35 WELCOME & INTRODUCTIONS

14:35 – 16:55 PART ONE - UNDER THE SPOTLIGHT

- **Energy Markets** - this session will offer an insight into the drivers of electricity and gas prices this year so far and the reasons behind some of the volatility. Following the update, sector representatives will engage in a panel discussion around the current energy markets and how they adjusted to manage the current energy procurement environment and associated risks.

Panel Chair: Mark Taylor, Director, Taylor Made Energy Solutions

Panel:

Daniel Shanley, Net Zero Carbon Manager, Electricity North West Limited

Madeleine Harris, Commercial Energy Analyst, Dwr Cymru Welsh Water

Matthew Charriaux, Category Manager, Safran UK

- **Energy as a Service** - with the energy as a service business model on the increase, energy management professionals should carefully consider whether this is a valid business proposition and whether all aspects of the service suit their purpose to ensure successful partnerships are in place to deliver on set energy efficiency and carbon reduction targets.

Energy as a service is where a service provider offers customers access to energy management services, capital upgrades for energy efficiency and on-site generation without any upfront costs. The customer pays for ongoing services and avoids initial infrastructure and equipment charges, much like the way some software is offered.

In this panel discussion, members of the EMA Steering Group will examine the model's pros and cons, what to look out for and what to keep in mind when considering energy as a service arrangement to decarbonise and/or increase energy efficiency.

Panel Chair: Victoria Limbrick, Energy Manager, Balfour Beatty

Panel:

Caroline Holman, Head of Energy, South Staffordshire Water

Mark Taylor, Director, Taylor Made Energy Solutions

Michael Johnson, Environment & Sustainability Strategic Lead, Cheshire Constabulary and Cheshire Fire and Rescue Service
